

ADDENDUM NO. 7

January 18, 2008

TO: **ALL POTENTIAL BIDDERS**

SUBJECT: BID NO.: 8578-0/23

TITLE: Development of Landfill Gas Utilization Systems (LFGUS) at North Dade and South Dade Landfills

BID OPENING DATE: **2:00PM, Wednesday, February 6, 2008**

This Addendum is and does become a part of the above-mentioned bid.

Subsequent to the Pre-Bid Conference held on January 17, 2008 at the South Dade Landfill, and the distribution of Addendum No. 6, the following additional information is provided as requested by one potential bidder:

QUESTION:

1. Re: Addendum No. 6: The four-page Capacity Analysis Calculations Tables does not contain the cell by cell waste deposits. The document contains entire landfill wastes for certain months in a reporting period ending in 2007. Similar information for each cell in each month of its existence is needed to do the calculation for which data was requested.
2. Addendum No. 6 does not indicate which cells the flare is currently drawing from. This information is required, along with the information above, to allow the bidders to determine the flows available.

ANSWER:

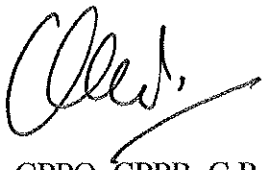

NORTH DADE LANDFILL:

1. North Dade West Cell is closed and has approximately 5.2 million tons of waste, mostly Trash. North Dade East Cell is active and has approximately 5.4 million tons of waste, all Trash. Per our latest calculations by Brown and Caldwell, North Dade East Cell can take approximately another 2 million tons of waste.
2. The Solid Waste Department is extracting gas from both of these cells.

SOUTH DADE LANDFILL:

1. South Dade Cells 1 and 2 together are closed and have approximately 4 million tons of waste, mostly Garbage.
South Dade Cell 3 is almost full while Cell 4 is active. Together they have approximately 10 million tons of waste, all Garbage.
2. The Solid Waste Department is extracting gas from Cells 1, 2 and 3. The extraction of gas from Cell 4 will begin within the next few months.

ALL OTHER INFORMATION REMAINS THE SAME

A handwritten signature in black ink, appearing to read 'Km! Ra', with a long horizontal stroke extending to the right.
